## Computer Information Systems/Telecommunications Networking

The Networking Telecommunications Associate Degree prepares you to work immediately upon graduation with personal computers in a networked environment. Position such as network (LAN) technician, network assistant, software and/or hardware specialist and helpdesk support are some of the occupations you will be qualified for upon successful completion of this program.

You will gain valuable skills in installing hardware and software and maintaining, troubleshooting and setting up networks that include both LAV and WAN technology such as routers and switches.

As a result of the skills developed in this program, you will be prepared to take several computer industry standard tests such as the A+, Network+, Windows 2000, and MOUS certification tests.
